

Introducing the new Microfibre Socket Mop

For
both wet
and dry
use

A versatile & cost-effective cleaning solution

The Vikan Microfibre Socket Mop delivers the cleaning power of microfibre with the functionality of a traditional socket mop. Designed for both wet and dry use, it ensures superior dirt and dust removal in hygiene-critical environments. Ideal for various industries, including food and beverage, food retail, manufacturing, facilities management, pharmaceuticals, and HoReCa.

✓ **Enhanced cleaning performance**

Microfibre technology ensures superior dirt pickup and effective cleaning results.

✓ **Cost-effective**

Reusable and can be laundered up to 50 times, reducing replacement costs.

✓ **Durable construction**

Heavy-duty polypropylene socket ensures longevity and easy maintenance.

✓ **Dry or wet use**

Static electricity generated by microfibre attracts and retains dust when used dry.

✓ **Compatible with Vikan handles**

Fits all Vikan threaded handles for seamless integration.

✓ **Colour coding**

Available in 8 colour options for hygiene zoning.

Item no. 3700x

Use with item no. 375028 and 37602x
