

Floor Pad Guide

Your helpful guide to ensure you choose the correct pad for the right job.

Keeping floors clean is more than simply cleaning off dust, dirt and spillage. It's also about making sure it keeps the look and shine it deserves, with less likelihood of scuffs, black marks, stains and scratches.

We have created this guide to help you choose which floor pad should be used depending on the floor type.

Whether you need to strip, clean or polish your flooring, you can rely on our floor pads to work faster, harder, for longer at a total lower cost.

Floor pads are colour coded for easy identification and usable on both sides. Open web construction enables easier dirt pick-up and permits faster cleaning of pads under running water.

Jangro floor pads come in a variety of sizes and various abrasians to help you achieve the best possible results for your floors. Pad sizes are from 10" to 21".

Choosing the correct floor pad

White Floor Pad

Dry polishing and buffing of unprotected floors with standard speed rotary floor machines, or for light spray cleaning.

Blue Floor Pad

Use wet for regular maintenance of unprotected floors. Recommended for dry stripping soft floors; also suitable for dry scrubbing of heavily soiled floors and spray cleaning medium soiled floors.

Black Floor Pad

Use for wet cleaning of old soiled floor finishes or heavy duty cleaning.

Red Floor Pad

The choice for routine spray cleaning and protected floors; cleans when damp, buffs when dry. Also suitable for light scrubbing.

Green Floor Pad

Use for daily scrubbing of unprotected hard floors. Also suitable for preparing hard floors and for stripping soft floors.

Brown Floor Pad

Ideal for dry stripping of protected floors or wet stripping with any convenient stripping solution. Can also be used with an automatic scrubber-drier to maintain heavily soiled industrial floors.

Scotch-Brite™ Surface Preparation Pad

Premium floor stripping pad that strips and prepares a wide variety of floors, using just a neutral detergent or water. It removes stains and visible scratches as well as tackling hard-to-clean floors with a deeper clean than a black pad, without the harshness or scratches.

Trizact™ Diamond HX Discs

Used to restore and bring back the natural beauty of stone floors, simply by using standard floor cleaning equipment. It is faster than a traditional diamond grind and allows you to refurbish your own floors without the need for specialists.

Scotch-Brite™ Purple High Shine Floor Pad

High performance, double-sided floor pad ideal for floors with medium shine in good condition. Cleans and polishes floors to a brilliant gloss finish without the use of chemicals.

Scotch-Brite™ Sienna High Shine Floor Pad

High performance, double-sided floor pad ideal for worn and dull floors in poor initial condition. Cleans and polishes to a medium shine without the use of chemicals.

Choosing the correct floor pad Note: Where there are multiple options given, pads are shown in order of preference from the left
