Pro-mist mop system

An innovative spray and microfibre flat mop system with antibacterial or disposable options.

The innovative microfibre flat mop system combines the new Pro-mist spray handle and microfibre pads for effective, rapid response floor cleaning without the need for buckets or constant wringing out.

The Pro-mist features a removable bottle and spray trigger, which delivers a fine mist of solution directly to the cleaning surface, helping you to clean and dry floors quickly. The mop's break-frame also has a built-in release system to avoid user contact with the soiled mop.

It is available in two kits – with a nano silver, antimicrobial microfibre mop to prevent bacterial growth, or a disposable Mi-mop version which is ideal in hygiene-critical areas such as restaurants where there is no access to laundry facilities.

Key features & benefits

- Microfibre mops attract and hold dirt for effective cleaning without the need for chemicals.
- Lightweight and no need for buckets so great for spot cleaning.
- Nano silver treated fibres for long-lasting antibacterial effectiveness.
- Dispose of Mi-mop after use to prevent cross contamination.
- Can be used wet for tougher cleaning or dry for drying or dusting.
- Removable water bottle means no buckets are required making cleaning easier and saving time.

What's in the kit?

The antibacterial kit features the Pro-mist handle, Uniko break-frame, along with a blue washable antibacterial microfibre mop. The disposable kit features the Pro-mist handle, Uniko break-frame, and a 10-pack of white disposable microfibre mops.

User instructions

Remove the Pro-mist bottle and fill with water and/or cleaning agent, then reattach. Squeeze the trigger to spray a fine mist onto the surface to be mopped. New mop heads can easily be attached to the frame by releasing the break-frame, inserting either end into the pockets and push to lock in place.

Washings instructions

Do not use fabric conditioner.
