Camapren 722

Camapren® 722 is a glove made of polychloroprene and natural latex, a proven material that provides the perfect balance of chemical and mechanical resistance. It's a more durable alternative to natural latex. The anatomical design helps reduce operator fatigue, while good flexibility and a distinct palm profile ensure excellent sensitivity and a sure grip. A cotton flock lining provides comfort. All in all, this glove enjoys high user acceptance due to its excellent comfort, reliability and value.
