

Superior and powerful dust extractor

The ATTIX 33 series comes with superior suction power, sealed dust system, automatic filter cleaning and several other user benefits - designed to meet the tough requirements in building & construction and other industries. A superior solution for professional customers looking for a robust, safe and reliable machine.

The ATTIX 33 offers remarkable productivity thanks to the automatic filter cleaning system InfiniClean™. The InfiniClean™ system ensures the continuous cleaning of the filter during operation using a reversed air-flow pulse, keeping suction performance on a high level. The downtime is reduced significantly, as the container can be filled without filter maintenance – even in the most demanding fine dust applications. The washable PTFE long-life filter minimises maintenance and reduces the overall service cost. Easy handling and user-friendliness - plus ease of movement when it comes to transportation from one work site to another - are other valuable features of the ATTIX 33 dust extractor. All models offer flexible storage solutions for tools and accessories, so everything you need is at hand.

Picture shown may not represent model quoted

- InfiniClean™ - Automatic filter cleaning system which minimises performance loss
- PTFE long-life filter with non-stick membrane and minimum 99.9% filtration efficiency
- Dust class L certification
- Unique dual filter solution available with HEPA filtration
- 30 litre container with steel castors and robust bumper
- MultiFit accessory system for the ultimate in task flexibility
- Flexible rubber straps, tool box storage and optional trolley handle for convenient storage and transport
- Optional motor cooling filter, exhaust air collector and long-life filter bag
