

GENERAL ACID CLEANER

USE

Heavy duty cleaner and descaler.

DESCRIPTION

Will remove mortar, plaster and rust from brickwork, stone and quarry tiles, and moss and algae from patios and paving stones. Recommended for cleaning and etching concrete floors.

FEATURES & BENEFITS

- Removes cement and plaster splashes – ideal for initial cleaning
- Cleans and etches concrete floors, ensures effective 'key' for seal application
- Removes industrial grime and stains from brick and stone exterior
- Descales and derusts metals prior to painting

HOW TO USE

For cleaning and descaling brick, stone and concrete, quarry tiles etc. and for metal derusting.

Initial cleaning and concrete etching: Dilute 1 part to 4 parts water. Allow to penetrate 5 to 10 minutes then rinse. For stubborn stains use neat.

Descaling metal: Dilute 1 part to 4 parts water. Brush on. Allow to descale, rinse, allow to dry. Paint or protect from corrosion immediately.

N.B. Do not use on or near linoleum floors, terrazzo, marble, acid sensitive stone, stainless steel, chrome or enamel.

Regular use on concrete will cause deterioration and is NOT recommended.

Descaled metal should be painted immediately to prevent rusting.

DO NOT USE ON ACID SENSITIVE SURFACES OR CHROME.

TYPICAL PRODUCT DATA

Appearance:	Liquid
Colour:	Red
Odour:	Acidic
pH – undiluted:	1.00

PACKAGING

BA091-5	2 x 5 Litre
---------	-------------

COMPOSITION

Contains Hydrogen Chloride.
