

TECHNICAL DATA SHEET

Saffire Absorbent Wood Fibre

CODE: KS70

Bagged soft wood fibre absorbent

A wholly recycled shredded wood fibre absorbent product for use in clearing up liquid spills in the workplace. A light product, making for easy handling and lower disposal costs. Impregnated with bicarbonate of soda for fire retardancy, but incineratable where facilities exist. Fully biodegradable as a product.

Benefits:

- Lightweight for easy handling and low disposal costs
- Incineratable for economy
- Fire retardant for safe adsorption of flammable liquids
- Wholly recycled material
- Biodegradable

Technical Data:

Appearance: Green wood flakes
Odour: Odourless
Material: Shredded wood material with sodium bicarbonate
Absorbency:
Solubility: Insoluble
Quantity: 30 litre poly bag, packed 70 to a pallet
Directions for use: Spread on spill affected area, then leave to absorb the spillage. Sweep the floor and dispose of the contaminated granules as waste, in accordance with local regulations, bearing in mind the product absorbed
